**CREATION COMPLEX MECHANISM OF PUBLIC ADMINISTRATION
OF CIVIL PROTECTION SERVICE SPECIALISTS' TRAINING**

Recently in Ukraine there has begun European integration, which provides transition to the constitutional, democratic and social state, in which much attention is paid to human rights, in particular his lives and safety ensuring. State Emergency Service of Ukraine (further – SES of Ukraine) has been created and functions exactly for performance of this purpose. Therefore productivity and efficiency of functioning of all service, in most cases, depends on people who work in SES of Ukraine, and their professional competence - from quality of their preparation.

Such scientists as S. Dombrovskaya, A. Romin, V. Sadkovoy etc. were engaged in research of processes of civil protection specialists' training.

Paper objective is to creation the complex mechanisms of civil defense specialists' training on European countries' example.

The system of civil protection service specialists' training includes many aspects, such as a standard-legal basis of preparation and competence of the faculty, organizational structure of all system in general, financial provision and others. Therefore it isn't enough to research legal, organizational and financial-economic mechanisms separately for improvement of all system as all of them are interconnected among themselves and give effective result, which is necessary for public administration system improvement in the sphere of civil protection service specialists' training in general, only in a case of their complex application. Proceeding from it, it is expedient to research the complex mechanism of public administration of civil protection service specialists' training consisting of legal, organizational and financial-economic components, which constantly are in unity and interrelation.

In our opinion, it is expedient to apply system approach to definition of the term «financial and economic management mechanism» as it allows investigation of mechanism as complete set of elements and subsystems in total and also relations and communications between them. State and local budget, funds of organizations, reserve funds, investments, credits, financial assets of charitable and other public organizations are the sources of financing of actions in the sphere of civil protection. A. Chubenko notes in the monograph, that financial relations connected with providing of civil protection system with monetary

and material resources exist only in the form of legal relationship, always have integrity, systemacity and formal definiteness connected with fact that they regulate accurately certain communications, which appear between object and subjects. The scientist specifies that on the one hand, the participants of the specified legal relationship are subjects who represent interests of the state in the sphere of public finances, in particular Verkhovna Rada of Ukraine, the Cabinet of Ministers of Ukraine, Ministry of Finance of Ukraine, State Treasury Service of Ukraine, National Bank of Ukraine, etc. and on the other side - the authorities, which are the part of uniform state civil protection system and directly participate in mobilization and use of financial resources of appropriate authorities budgets [1.a.i.13]. In our case, higher educational institutions of SES of Ukraine have the mediated relation to Uniform state system of civil protection of Ukraine therefore the main source of financing is the state budget of SES of Ukraine. Financing of higher education institutions of SES of Ukraine in full including persons of private and commanding structure of civil protection service, as a part of Ministry of Education and Science of Ukraine, isn't provided by the current legislation.

V. Bakumenko in his education guidance inclines to an integrated approach to legal regulation of activity in certain spheres, branches or on nation-wide, regional and local problems in the form of systems of interconnected and complementary standard and legal documents forming the integrated legal framework of this activity and which he defined as problem-oriented standard-legal bases. The reason of that standard-legal bases work today in various problem-oriented fields of activity, as a rule, don't correspond or only partially correspond to requirements of public life owing to certain shortcomings, internal contradictions and interaction of political, economic, social, humanitarian, ecological and other factors.

The complex mechanism of public administration of civil protection service specialists' training has been formed. It is defined that process of improvement of system of Ukrainian SES specialists' training of must contain legal, organizational and financial-economic component, which constantly are in unity and interrelation.
